

## Bouvier Breeders, we need your help!

The OFA offers **Confidential** breed surveys for breed parent clubs. Developed jointly with BHF, OFA launched its Bouvier des Flandres Health survey in June 2020. This survey allows Bouvier enthusiasts to confidentially enter health data on their own dogs, as well as gain an understanding of health issues experienced by other bouviers.

So far the information obtained from the 484 dogs entered (223 males & 255 females ) has identified these top health problems:

1. 25% Cancer
2. 16% Orthopedic Arthritis
3. 14% Allergy
4. 9.2% Gastrointestinal “other”

### **BHF asks Breeders to reach out to your puppy owners and have them complete the survey!**

Here is the direct link:

TO ENTER YOUR DOG:

- **Click** on "**Bouvier des Flandres**"- the print will turn orange temporarily (nothing else will happen), then
- **Scroll** down to the bottom of the page.
- **Click** on "**Answer Survey**" to enter data for each Bouvier that has lived with you in the past 15 years.
- **Click** on "**View Results**" to see current health issues other owners have entered.
